The explanatory notes to the condensed interim financial statements
as of 31st March 2018
(all the amounts are expressed in RON, unless otherwise stated)

2. Basis of drawing up

a) Declaration of Conformity (continued)

The date of 31st of December 2015 is the date of transition to IFRS as the basis for accounting, when the operations determined by the changeover from the CNVM Regulation no. 4/2011 to the Accounting Regulations in accordance with IFRS. Between 2011 and 2014, the Company prepared financial statements based on IFRS (restatement of statutory financial statements) that were audited and published. The simplified interim financial statements prepared on 31st of March 2018 were prepared in accordance with the requirements of IAS 34 "Interim Financial Statements" and should be read together with the individual financial statements for the year 2017 prepared in accordance with Standard no. 39/2015 for the approval of Accounting Regulations in accordance with International Financial Reporting Standards applicable to entities authorized, regulated and supervised by the Financial Supervision Authority of the Financial Instruments and Investments Sector.

In accordance with the provisions of Regulation no. No 1606/2002 of the European Parliament and of the Council of the European Union of 19th of July 2002 and of Law no. 24/2017 on issuers of financial instruments and market transactions, the Company has the obligation to prepare and submit to ASF consolidated annual financial statements in accordance with IFRS no later than 4 months after the end of the financial year and ensure their availability for at least 10 years.

The consolidated financial statements of the S.I.F. Oltenia S.A. 31st of December 2017 were drafted, approved and released on 25th of April 2018. These can be consulted electronically on the company's website: www.sifolt.ro, section "Investor Info/Reports/Periodical Reports".

Also based on the same regulations, the Company prepares consolidated half-yearly accounting report in accordance with IFRSs and ensures its availability for at least 10 years.

The consolidated half-yearly accounting report shall be prepared and submitted to ASF no later than 3 months after the end of the quarter. It will be drawn up, approved by the Board of Directors and made available to the public in electronic format on the company's website: www.sifolt.ro, section "Investor Info/Reports/Periodical Reports".

The Company's accounting records are denominated in RON.

b) Presentation of financial statements

The presentation adopted by the Company is based on the liquidity within the simplified interim individual statement of the financial position, and the disclosure of the income and costs has been made in relation to their nature within the simplified interim individual statement of profit or loss and other items of the overall result. The Company considers that such disclosures provide information that is more credible and relevant than what would have been disclosed under other methods permitted by IAS 1 "Presentation of Financial Statements".

c) Functional and Presentation Currency

The Company's management believes that the functional currency, as defined by IAS 21 "The Effects of Foreign Exchange Rates Variation", is the Romanian currency (RON or lei). The simplified interim individual financial statements are presented in RON, rounded to the nearest RON, the currency that the Company's management chose to be the presentation currency.

The simplified interim individual financial statements are prepared on the basis of the fair value convention for financial assets and liabilities measured at fair value through profit or loss and financial assets at fair value through other comprehensive income except for those for which the fair value does not can be credibly established.

The explanatory notes to the condensed interim financial statements
as of 31st March 2018

(all the amounts are expressed in RON, unless otherwise stated)

2. Basis of drawing up (continued)

d) Basis of Evaluation

Other financial assets and liabilities, as well as non-financial assets and liabilities are presented at amortized cost, re-valued or historical cost.

e) Using Estimates and Judgments

The preparation of the simplified interim individual financial statements in accordance with IFRS implies the management's use of estimates, judgments and assumptions that affect the application of the accounting policies as well as the reported amount of assets, liabilities, income and expenses.

The estimates and assumptions associated with these judgments are based on historical experience as well as on other factors considered to be reasonable in the context of these estimates. The results of such estimates form the basis of the judgments relating to the carrying amounts of assets and liabilities that cannot be obtained from other sources of information. The results obtained may differ from the estimates amounts.

The Company periodically reviews the estimates and assumptions underlying the accounting records. The revisions of the accounting estimates are recognized in the period in which the estimate is reviewed, if the review affects only that period, or in the period in which the estimate is reviewed and the future periods, if the review affects both the current period and future periods.

f) Changes in Accounting Policies

The accounting policies adopted are consistent with those used in the previous year.

3. Significant Accounting Policies

The accounting policies applied in these simplified interim financial statements are consistent with those in the separate financial statements as at 31st of December 2017 and have been applied consistently for all periods presented in these simplified interim financial statements.

According to the Norm no. 39/2015 for the approval of the Accounting Regulations in accordance with International Financial Reporting Standards applicable to authorized, regulated and supervised entities by the Financial Supervision Authority of the Financial Instruments and Investment Sector, starting with the annual financial statements for the financial year 2015, the Company applies the International Financial Reporting Standards adopted by the European Union as official accounting regulations.

In this respect during 2017, the Company issued interim financial reports in accordance with IAS 34 "Interim Financial Reporting".

During the first quarter of 2018 the provisions of Norm no. 2/2018 - Norm regarding the modification and completion of the Norm of the Financial Supervisory Authority no. 39/2015 for the approval of accounting regulations in accordance with International Financial Reporting Standards applicable to entities authorized, regulated and supervised by the Financial Supervision Authority of the Financial Instruments and Investments Sector, ie. the gain or loss resulting from the nonrecognition of financial assets measured at fair value through other items of the comprehensive income were recorded in the income statement.

IFRS 9 Financial instruments and liabilities

1st January 2018 is the date of transition to the application of IFRS 9 "Financial Instruments". It replaces the existing IAS 39 "Financial Instruments: Recognition and Measurement" provisions. The main features of IFRS 9 are:

3. Significant Accounting Policies (continued)

- Financial assets are classified into three measurement categories: those that are subsequently measured at amortized cost, those that are subsequently measured at fair value through other comprehensive income (FVOCI) and those that are subsequently measured at fair value through profit or loss (FVTPL);
- Classification of debt securities is determined by the entity's business model for the management of financial assets and contractual cash flows representing only principal and interest payments (SPPIs). If a debt instrument is held to be cashed, it can be valued at the amortized cost if it also meets the SPPI requirement. Debt instruments that meet the SPPI requirement held in a portfolio by an entity both to collect asset cash flows and to sell assets may be classified as FOCI. Financial assets that do not contain cash flows that are SPPIs should be measured at FVTPL (eg: derivatives). Embedded derivatives are no longer separated from financial assets but will be included in the assessment of the SPPI status;
- Investments in equity instruments are always measured at fair value. In initial recognition, management may make an irrevocable choice to present fair value changes in other comprehensive income, provided that the instrument is not held for trading. If the equity instrument is held for trading, changes in fair value are presented in profit or loss;
- Most of the IAS 39 requirements for classification and measurement of financial liabilities have been carried forward unchanged in IFRS 9. The key change is that an entity should disclose the effects of changes in the credit risk of financial liabilities designated at fair value through profit or loss in other elements of the overall result.

As at 31st of December 2017, most of the Company's financial assets consisted of equity instruments in the form of shareholdings in the various issuers that constituted the Company's (equity) portfolio. Under IAS 39, these assets were classified as available-for-sale financial assets, whose valuation differences at the end of the period are accounted for by other comprehensive income.

At 31st of December 2017, the Company held the following types of financial instruments that are subject to IFRS 9: equity instruments (equity), debt instruments (fund units), other financial assets and liabilities.

Following the analysis for compliance with IFRS 9, the Company has decided for the subsequent valuation of the following classification of financial instruments:

- equity instruments (equity) are valued at fair value through other comprehensive income (FOVCI);
- debt instruments (fund units) are valued at fair value through profit or loss (FVTPL).

The rest of the financial assets and liabilities are stated at amortized cost.

The option to classify as equity instruments (equities) measured at fair value through other items of comprehensive income is reflected in both IAS 39 and IFRS 9.

Thus, the classification of these instruments at fair value through other items of comprehensive income will not be affected by the new standard. Value differences will still be recorded in other items of the overall result.

Impairment adjustments made through the profit and loss account for available-for-sale financial assets at 31st of December 2017 that were transferred to assets measured at fair value through other overall income items were transferred to "Retained result from IFRS 9" by diminishing the reserve from the change in fair value.

The standard must be applied for financial periods starting from 1st January 2018. The Company shall apply the new stipulations as from 1st January 2018. The comparative statements for 2017 will not be adjusted.

When switching to IFRS 9, the Company does not restate earlier periods.

13. Financial assets (continued)

On the 31st of March 2018 and 31st of December 2017, in the category of shares valued at the fair value, there are mainly included the value of the shares held at the following issuers: OMV PETROM SA Bucharest, BRD - Groupe Societe Generale, BANCA TRANSILVANIA SA Cluj Napoca, CNTEE TRANELECTRICA SA Bucharest, SNTGN TRANSGAZ SA Mediaș, ARGUS SA Constanța, ANTIBIOTICE SA Iași.

• **The hierarchy of fair values**

For the calculation of fair value, the Company uses the following hierarchy of methods:

- Level 1: quoted (unadjusted) prices in active markets for identical assets and liabilities.
- Level 2: entries, other than the quoted prices included in Level 1 that are observable for assets or liabilities, either directly (e.g., prices) or indirectly (e.g., derived from prices).
- Level 3: evaluation techniques largely based on unobservable items. This category includes all instruments for which the evaluation technique includes elements that are not based on observable data and for which the unobservable input parameters can have a significant effect on the instrument evaluation. This category includes instruments that are valued based on the quoted prices for similar instruments but for which there must be done adjustments largely based on unobservable data or estimates to reflect the difference between the two instruments.

<i>In RON</i>	31st of March 2018	31st of December 2017
Level 1	988,319,832	866,393,528
Level 2	129,194,775	314,181,351
Level 3	695,294,552	617,522,138
Total	1,812,809,159	1,798,097,017

The fair value evaluation of the equity shares held on the 31st of March 2018 was carried out as follows:

- for the securities quoted and traded during the reporting period, the market value was determined by taking into account the quotation from the last trading day (the quotation for closing on the main capital market for level 1, and for level 2 there were taken into account the quotations for the shares traded during the last 30 trading days);
- for the securities quoted that did not have any transactions in the last 30 trading days of the reporting period, and for the unquoted securities, the market value was determined according to the issuers' own capital on the 31st of December 2016;
- for the securities related to the trading companies under insolvency or reorganization, the evaluation is done at zero value;
- for the shareholdings at OPCVM, the value taken into account was the last unit value of the net asset, calculated and published.
